### PERSONAL PROFILE

Third-year Informatics undergraduate student at Del Institute of Technology with a strong foundation in software engineering, algorithmic problem-solving, and object-oriented programming. Experienced in developing web-based applications using the Laravel framework and contributing to structured software projects through Agile methodologies. Actively involved in organizational leadership and committee work, demonstrating strong collaboration, communication, and project management skills. Highly motivated to contribute to real-world IT projects while continuously developing technical, professional, and leadership competencies.

### EDUCATION

**Institut Teknologi Del - Laguboti**  
Bachelor of Informatics

AUG 2023 – PRESENT

### EXPERIENCE

**PT Multi Teknik Jaya Mandiri**

JUNE 2025 – JULY 2025

*IT Support Intern & Video Editor*

- Provided IT support services including basic troubleshooting, system assistance, and technical support for internal operations.
- Worked as a video editor to produce and publish project documentation content showcasing company projects.
- Managed and prepared multimedia content for social media and digital platforms to improve company visibility and project branding.

**HIMASTI Competitive HICO – IT Del**

MAY 2025

*3rd Place, Competitive Programming Competition*

- Achieved 3rd place in a team-based programming competition hosted on *HackerRank*, solving algorithmic challenges with time constraints.
- Played a key role in solving problems efficiently, managing team strategy, and adapting across multiple programming languages.

### ORGANISATIONAL EXPERIENCE

**Department of Communication and Information – IT Del**

JAN 2026 - PRESENT

*Head of Department*

- Lead and coordinate three core divisions: Design, Publication, and Documentation, ensuring effective collaboration, clear task distribution, and integrated workflows across content creation, social media publishing, and event documentation activities.
- Oversee social media content design, publishing workflows, and event documentation for official BEM platforms.
- Ensure integrated communication strategy and consistent digital branding across all channels.

**Department of Communication and Information – IT Del**

NOV 2024 – JAN 2026

*Creative Division Member*

- Contributed creative ideas to support the planning and execution of departmental programs and initiatives.
- Collaborated with team members to enhance visual and conceptual communication strategies within the department.
- Supported internal communications through creative input for events and publications.

**Photography Competition – Department of Communication and Information, IT Del**

FEB 2025-MAR 2025

*Head of Committee*

- Led the organizing team in planning and executing the photography competition, including creating the timeline and delegating tasks.
- Coordinated the judging process of submitted photos in collaboration with the jury team based on predefined criteria.
- Managed the publication of competition results through official communication channels, including winner announcements and event documentation.

### PROJECTS

**Sistem Informasi Sekolah – SMK Negeri 3 Balige**

JAN 2026 – PRESENT

*Software Development Project – Integrated School Information System*

**Duration:** 4 Months | **Methodology:** Agile (Sprint-Based Development)

**Role:** QA / Software Tester

**Technologies:** Laravel, React, Maestro, Postman, Docker, GitHub, Visual Studio Code

- Contributed to the development of a software-based integrated school information system supporting administration, academic data management, student portfolios, and public information services.
- Performed quality assurance and testing activities in a sprint-based Agile environment to ensure system reliability, functionality, and usability.
- Collaborated closely with developers and stakeholders to validate functional requirements and ensure system alignment with institutional needs.

Web-Based Information System Project

Duration: 2 Months | Methodology: Agile (Sprint-Based Development)

Role: Fullstack Developer

Technologies: Laravel, React, Maestro, GitHub, Visual Studio Code

- Contributed to the development of an integrated web-based platform connecting students, alumni, campus, and industry partners for career and alumni management.
- Developed and maintained both frontend and backend components using React and Laravel, ensuring seamless integration and optimal system performance.
- Collaborated within agile sprint cycles, participating in feature planning, implementation, debugging, and continuous improvement of system functionality and user experience.
- Performed testing and debugging to ensure system reliability, functionality, and usability across multiple modules.

MealMap Application

NOV 2024 – DES 2024

Capstone Project – Object-Oriented Programming Course

Technologies Used : NetBeans, mySQL.

Key Project : Developed a meal planning and tracking application to help users organize their daily meals, utilizing object-oriented programming principles.

ADDITIONAL INFORMATION

Languages

Indonesia (Native), English (Intermediate)

Industry Knowledge

Web-Based Application Development, Object-Oriented Programming (OOP), Algorithms & Data Structures, Database Systems, Software Testing, QA Processes

Technology

JavaScript, Docker, Flutter, Kotlin, Ktor, GitHub, Laravel, React.js, Python, PostgreSQL, Java, NetBeans, Figma, SQLyog, GitHub, Maestro, C++, C, Haskell, Visual Studio Code,

Interpersonal Skill

Leadership, Teamwork, Adaptability, Communication, Problem Solving, Public Speaking, Team Collaboration
